

BUFFER AND STEEP SLOPE CLASSIFICATION SYSTEM

BOUNDARY LINE LEGEND

- <30' HABITAT ENHANCEMENT BOUNDARY
- 30' WATER QUALITY BUFFER BOUNDARY
- ≥30' OF BUFFER
- <30' OF BUFFER
- 50' BUFFER BOUNDARY
- 30' - 100' BUFFER BOUNDARY

SHADING LEGEND

- BUFFER AREA <30 FEET IN WIDTH
- BUFFER AREA 30-100 FEET IN WIDTH
- BUFFER AREA ≥ 100 FEET IN WIDTH
- STEEP SLOPES ≥ 30%

NOTES:

2) Minimum water quality buffer limits are not identified for the west bank of Stream J. Modifications to the number and location of the individual residential units in Block L and adjustments to the length and location of the roadway leading to these units will be included in the Master Development Plan (MDP) for the site. These adjustments will provide for habitat protection in the headwaters area of the Stream/Wetland J complex with a combination of 100 feet of conservation and water quality buffers. Further downstream, a minimum of 50 feet of water quality buffers will be established in association with modified roadway construction. Modifications to the placement of Block L residential units and the associated access road, and subsequent adjustments to the Buffer Management Plan, will be incorporated into the MDP during the Special Permit process.
